## Subject Index of Volume 58

- Absorption**  
marangoni instability during absorption accompanied by chemical reaction, 151
- Adsorption**  
thermodynamics and kinetics of low pressure methanol synthesis, 101  
copper(II) and nickel(II) adsorption by *Rhizopus arrhizus* in batch stirred reactors in series, 265
- Adsorption constant**  
two-step adsorption models in molecular sieves, 21
- Adsorption models**  
two-step adsorption models in molecular sieves, 21
- Aeration**  
aeration of bioreactors by self-aspirating impellers, 59
- Agitation**  
heat transfer in jacketed agitated vessels equipped with non-standard baffles, 135
- Alternative energy**  
chemo-autotrophic biogas purification for methane enrichment: mechanism and kinetics, 71
- Atomization**  
development and experimental verification of momentum, heat and mass transfer model in spray drying, 123
- Axial dispersion**  
axial dispersion in packed fiber beds, 245
- Bed formation**  
phase inversion: a method for separation of fine liquid-liquid dispersions, 45
- BHK cell culture**  
silicone-based microcarriers: preparation and BHK cell culture, 65
- Biogas**  
chemo-autotrophic biogas purification for methane enrichment: mechanism and kinetics, 71
- Biomethanation**  
chemo-autotrophic biogas purification for methane enrichment: mechanism and kinetics, 71
- Bioreactor**  
analysis of non-isothermal tubular reactor packed with immobilized enzyme systems, 275
- Catalysis**  
influence of the porous nature of coals on Mo-catalysed hydrogenation kinetics, 53  
thermodynamics and kinetics of low pressure methanol synthesis, 101
- Catalyst deactivation**  
kinetic modelling of the deactivation of a commercial silica-alumina catalyst during isopropylbenzene cracking, 7
- Catalytic reactor**  
pseudoadiabatic operation for fixed-bed catalytic reactors: methods for finding the limits of the regime, 33
- Chemical reaction**  
marangoni instability during absorption accompanied by chemical reaction, 151  
modelling of gas-solid fluidised bed reactors taking into account the variation of gas output from chemical reactions, 223
- Chemoautotroph**  
chemo-autotrophic biogas purification for methane enrichment: mechanism and kinetics, 71
- Closure problem**  
closure problem for parallel chemical reactions, 161
- Coal**  
influence of the porous nature of coals on Mo-catalysed hydrogenation kinetics, 53
- Coking**  
kinetic modelling of the deactivation of a commercial silica-alumina catalyst during isopropylbenzene cracking, 7
- Computer model**  
development and experimental verification of momentum, heat and mass transfer model in spray drying, 123
- Concentration dependent surface diffusivity**  
the simulation of solid-liquid adsorption in activated carbon columns using estimates of intraparticle kinetic parameters obtained from continuous stirred tank reactor experiments, 239
- Crystal growth**  
crystal growth kinetics of pentaerythritol, 215
- Crystallization**  
nucleation kinetics of pentaerythritol, 209  
crystal growth kinetics of pentaerythritol, 215
- Cylindrical collector**  
theoretical study on deposition of flexible and stiff fibrous aerosol particles on a cylindrical collector, 109
- Degradation kinetics**  
some aspects of the drying of protein products, 197
- Deposition**  
theoretical study on deposition of flexible and stiff fibrous aerosol particles on a cylindrical collector, 109
- Drag**  
laminar flow hydrodynamics of rotary dynamics filters, 145
- Dryer**  
development and experimental verification of momentum, heat and mass transfer model in spray drying, 123
- Drying**  
some aspects of the drying of protein products, 197
- Efficiency**  
hydrodynamics and mass transfer in a three-phase fixed-bed reactor with cocurrent gas-liquid downflow, 83
- Extraction**  
kinetics of penicillin G extraction by Amberlite LA-2 as a mobile carrier in a constant-interface-area cell, 285

- Fast parallel reactions
  - the influence of viscosity on the product distribution of fast parallel reactions, 15
- Fibre
  - axial dispersion in packed fiber beds, 245
- Filtration
  - laminar flow hydrodynamics of rotary dynamics filters, 145
- Fixed-bed adsorbers
  - the simulation of solid-liquid adsorption in activated carbon columns using estimates of intraparticle kinetic parameters obtained from continuous stirred tank reactor experiments, 239
- Fixed-bed reactor
  - pseudoadiabatic operation for fixed-bed catalytic reactors: methods for finding the limits of the regime, 33
- Flexible fibrous aerosol particles
  - theoretical study on deposition of flexible and stiff fibrous aerosol particles on a cylindrical collector, 109
- Fluidized bed
  - modelling of gas-solid fluidised bed reactors taking into account the variation of gas output from chemical reactions, 223
- Gas holdup
  - the phase holdups in a gas-liquid-solid circulating fluidized bed, 259
- Gas-liquid bioreactor
  - aeration of bioreactors by self-aspirating impellers, 59
- Gas-liquid contact
  - development and experimental verification of momentum, heat and mass transfer model in spray drying, 123
- Gas stream
  - theoretical study on deposition of flexible and stiff fibrous aerosol particles on a cylindrical collector, 109
- Heat transfer
  - heat transfer in jacketed agitated vessels equipped with non-standard baffles, 135
- Heterogeneous adsorbent
  - the simulation of solid-liquid adsorption in activated carbon columns using estimates of intraparticle kinetic parameters obtained from continuous stirred tank reactor experiments, 239
- Hold-up
  - hydrodynamics and mass transfer in a three-phase fixed-bed reactor with cocurrent gas-liquid downflow, 83
- Hydrogenation
  - influence of the porous nature of coals on Mo-catalysed hydrogenation kinetics, 53
  - thermodynamics and kinetics of low pressure methanol synthesis, 101
- Immobilized enzyme
  - analysis of non-isothermal tubular reactor packed with immobilized enzyme systems, 275
- Incompressible fluids
  - turbulent micromixing in chemical reactors — a review, 183
- Kinetic modelling
  - kinetic modelling of the deactivation of a commercial silica-alumina catalyst during isopropylbenzene cracking, 7
- Kinetics
  - influence of the porous nature of coals on Mo-catalysed hydrogenation kinetics, 53
- Labile products
  - some aspects of the drying of protein products, 197
- Laminar flow
  - plasma enhanced deposition of a-Si-H: comparison of two reactor arrangements, 1
  - laminar flow hydrodynamics of rotary dynamics filters, 145
- Liquid-liquid dispersions
  - phase inversion: a method for separation of fine liquid-liquid dispersions, 45
- Liquid mixing
  - heat transfer in jacketed agitated vessels equipped with non-standard baffles, 135
- Marangoni instability
  - marangoni instability during absorption accompanied by chemical reaction, 151
- Mass transfer
  - plasma enhanced deposition of a-Si-H: comparison of two reactor arrangements, 1
  - hydrodynamics and mass transfer in a three-phase fixed-bed reactor with cocurrent gas-liquid downflow, 83
  - liquid-side mass transfer characteristics of a structured packing, 251
- Mass transfer coefficient
  - two-step adsorption models in molecular sieves, 21
- Mass transport
  - method of yield evaluation for pressure-driven membrane processes, 175
- Membrane processes
  - method of yield evaluation for pressure-driven membrane processes, 175
- Methane
  - chemo-autotrophic biogas purification for methane enrichment: mechanism and kinetics, 71
- Methanobacterium thermoautotrophicum*
  - chemo-autotrophic biogas purification for methane enrichment: mechanism and kinetics, 71
- Methanogen
  - chemo-autotrophic biogas purification for methane enrichment: mechanism and kinetics, 71
- Michaelis-Menten kinetics
  - analysis of non-isothermal tubular reactor packed with immobilized enzyme systems, 275
- Microcarriers
  - silicone-based microcarriers: preparation and BHK cell culture, 65
- Micromixing
  - closure problem for parallel chemical reactions, 161
  - turbulent micromixing in chemical reactors — a review, 183
- Micro-organisms
  - copper(II) and nickel(II) adsorption by *Rhizopus arrhizus* in batch stirred reactors in series, 265
- Modelling
  - plasma enhanced deposition of a-Si-H: comparison of two reactor arrangements, 1
  - laminar flow hydrodynamics of rotary dynamics filters, 145
  - modelling of gas-solid fluidised bed reactors taking into account the variation of gas output from chemical reactions, 223
  - analysis of non-isothermal tubular reactor packed with immobilized enzyme systems, 275
  - kinetics of penicillin G extraction by Amberlite LA-2 as a mobile carrier in a constant-interface-area cell, 285
- Molecular sieves
  - two-step adsorption models in molecular sieves, 21
- Multiphase reactor
  - hydrodynamics and mass transfer in a three-phase fixed-bed reactor with cocurrent gas-liquid downflow, 83

- Newtonian fluid  
  heat transfer in jacketed agitated vessels equipped with non-standard baffles, 135  
  laminar flow hydrodynamics of rotary dynamics filters, 145
- Packed bed  
  axial dispersion in packed fiber beds, 245
- Packing  
  liquid-side mass transfer characteristics of a structured packing, 251
- Parallel reactions  
  closure problem for parallel chemical reactions, 161
- Particle circulation  
  the phase holdups in a gas-liquid-solid circulating fluidized bed, 259
- Peak retention time  
  two-step adsorption models in molecular sieves, 21
- Penicillin G  
  kinetics of penicillin G extraction by Amberlite LA-2 as a mobile carrier in a constant-interface-area cell, 285
- Permeate flux  
  method of yield evaluation for pressure-driven membrane processes, 175
- Phase inversion  
  phase inversion: a method for separation of fine liquid-liquid dispersions, 45
- Plasma reactor  
  plasma enhanced deposition of a-Si-H: comparison of two reactor arrangements, 1
- Porosity  
  influence of the porous nature of coals on Mo-catalysed hydrogenation kinetics, 53
- Preparation  
  silicone-based microcarriers: preparation and BHK cell culture, 65
- Protein products  
  some aspects of the drying of protein products, 197
- Purification  
  kinetics of penicillin G extraction by Amberlite LA-2 as a mobile carrier in a constant-interface-area cell, 285
- Reaction kinetics  
  thermodynamics and kinetics of low pressure methanol synthesis, 101  
  kinetics of penicillin G extraction by Amberlite LA-2 as a mobile carrier in a constant-interface-area cell, 285
- Reactors  
  turbulent micromixing in chemical reactors — a review, 183
- Reynolds number  
  the influence of viscosity on the product distribution of fast parallel reactions, 15
- Silicone  
  silicone-based microcarriers: preparation and BHK cell culture, 65
- Solubility  
  nucleation kinetics of pentaerythritol, 209
- Stiff fibrous aerosol particles  
  theoretical study on deposition of flexible and stiff fibrous aerosol particles on a cylindrical collector, 109
- Stirred bioreactor  
  aeration of bioreactors by self-aspirating impellers, 59
- Stirred reactor  
  copper(II) and nickel(II) adsorption by *Rhizopus arrhizus* in batch stirred reactors in series, 265
- Stirred-tank reactor  
  heat transfer in jacketed agitated vessels equipped with non-standard baffles, 135
- Surface renewal  
  method of yield evaluation for pressure-driven membrane processes, 175
- Synthesis  
  thermodynamics and kinetics of low pressure methanol synthesis, 101
- Temperature  
  analysis of non-isothermal tubular reactor packed with immobilized enzyme systems, 275
- Temperature runaway  
  pseudoadiabatic operation for fixed-bed catalytic reactors: methods for finding the limits of the regime, 33
- Three-phase fluidization  
  the phase holdups in a gas-liquid-solid circulating fluidized bed, 259
- Tubular reactor  
  closure problem for parallel chemical reactions, 161
- Turbulent micromixing  
  turbulent micromixing in chemical reactors — a review, 183
- Uncoupled methanogenesis  
  chemo-autotrophic biogas purification for methane enrichment: mechanism and kinetics, 71
- Viscosity  
  the influence of viscosity on the product distribution of fast parallel reactions, 15
- Waste water  
  copper(II) and nickel(II) adsorption by *Rhizopus arrhizus* in batch stirred reactors in series, 265
